

CHILDCARE PROVIDERS ASTHMA TRAINING

Form #4

Directors' Post-training follow-up survey - (To be completed by training participants who are responsible for programs at their facility approximately 6-12 weeks following completion of the training).

In **April**, you attended an asthma seminar provided by the American Lung Association and the Controlling Asthma in American Cities Project conducted by the Minnesota Visiting Nurses Agency. We would like to know if you have been able to use some of the information from the seminar in your childcare setting.

Your answers to the questions below are important in helping determine if this program has helped you to care for children with asthma. Your answers will also help us make the program more useful and effective in the future. Please take a few minutes to answer these questions and return this form in the enclosed envelope.

Your answers will be confidential and any reports we write will include only aggregated responses from all training participants. Thank you.

1. How many children with asthma do you care for right now? _____
2. Of the children with asthma you care for right now, how many have a completed Asthma Action Plan/individualized asthma care plan on file at your location? _____
3. In the past 2 weeks, how many times has an Asthma Action Plan/individualized asthma care plan been used at your location? _____
4. Since the training, have you used the Indoor Air Quality Checklist in your facility? Yes No
If no, do you intend to use it during the next 6 months? Yes No
5. Since the training, have you made any changes in the day care environment to reduce children's exposure to asthma triggers? Yes No
If yes, please explain changes: _____

If no, do you intend to make any changes during the next 6 months? Yes No
