

**CAACP SYSTEM CHANGE PROJECT
MONTHLY CLINIC STATUS REPORT
month**

Due Date: The last day of each

Clinic Name:

Date/Report Month:

Collaborative Aim: To improve asthma care for children 0-18 years old using a collaborative learning approach, the six arenas of the Chronic Care Model, and a CQI improvement process.

Actions and Goals:

1. Assess and classify asthma severity at 95% or more of all asthma visits
2. Ninety-five percent (95%) of patients with persistent asthma will be treated with maintenance anti-inflammatory medications
3. Ninety-five percent (95%) of patients with persistent asthma will have a new or updated written asthma management plan .
4. Providers will document patient's self-management goals at 50% or more of asthma visits.
5. Spirometry will be done on 50% of patients with persistent asthma
6. Implement a registry of patients with asthma with the goal of adding ≥ 10 patients each month until all children with asthma are listed in the registry
7. Other
8. Other

Changes Implemented -- Please document changes tested and/or implemented (in each component of the Chronic Care Model), remember to include your results, what you learned and any additional comments.
